## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3751

1. Applicant states that this application is a continuation or divisional application of the prior-filed application. A continuation or divisional application cannot include new matter. Applicant is required to change the relationship (continuation or divisional application) to continuation-in-part because this application contains the following matter not disclosed in the prior-filed application: Overflow drain pipe 34 illustrated in Fig 1A of both applications.

The examiner has corrected the bib data sheet associated with the instant application to reflect the continuation-in-part status.

2. The declaration is defective. A new declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. The specification associated with the instant application is different from that acknowledged at the time of execution. See MPEP § 602.

3. The proposed drawing correction filed on June 30, 2006 is disapproved as containing new matter. The new structure of the overflow drain pipe 34 is not found in the originally filed disclosure.

4. The disclosure is objected to because of the following informalities: Reference characters "37A", "37B", "56", "61", and "68" lack a detailed description; and in the amended

Art Unit: 3751

paragraph on page 4. "beginning with line 7" (sic; line 5), lines 4 and 11, reference to "port 30" appears inaccurate as the threads 31 are associated with pipe 34, and the cap 52 engages pipe 34 (Fig. 3) not end wall 24.

Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 5 is rejected under 35 U.S.C. 102(a/b/e) as being anticipated by Minnick.

The Minnick reference discloses an overflow system comprising: a pipe 3; a cap 5 including an outer face 15, a cylindrical body 6 having threads (col. 3 lns. 14-22), and a flange 11; and a sealing membrane 16, as claimed.

Art Unit: 3751

Applicant argues at page 10 of the response filed June 30, 2006 Minnick does not disclose a membrane affixed to an outer face of an annular flange. The examiner can not agree noting lines 41-44 in column 3 of Minnick.

7. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.

8. The grounds of rejection have been reconsidered in light of applicant's arguments, but are still deemed to be proper.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
